

1. The present invention relates to a method of
2. determining the position of a point on a
3. curved surface, and more particularly to a
4. method of determining the position of a point
5. on a curved surface by means of a series of
6. intersecting circles.

Fig. 5

FIG. 1 is a schematic diagram of a mechanical assembly, showing a cross-sectional view of a device with various components labeled with numbers 1 through 32. The diagram illustrates the internal structure and components of the assembly, including a housing, internal mechanisms, and various fasteners and seals.
